

Tung's Palmar Diagnosis

The Essence of Tung's Palmar Diagnosis

Master Tung's diagnosis mostly depends on observing patient's palm. The five zang channels of the palm are displayed in the above figure. Examine the palm for blue vessels, redness, abnormal spots, tenderness etc.. The channels of the palm are as follows:

- Line from index finger to LU10: lung.
- From middle finger to PC8: heart.
- From the ring finger to the wrist crease: liver & spleen.
- From the small finger to the wrist crease and the ulnar side of the palm: kidney.
